

# Website Vulnerability Scanner Report

✓ <https://www.spacex.com/vehicles/falcon-9/>

! The Light Website Scanner didn't check for critical issues like SQLi, XSS, Command Injection, XXE, etc. [Upgrade to run Deep scans](#) with 40+ tests and detect more vulnerabilities.

## Summary

### Overall risk level:

Low

### Risk ratings:

High:

0

Medium:

0

Low:

4

Info:

15

### Scan information:

Start time: Jun 18, 2024 / 22:41:26

Finish time: Jun 18, 2024 / 22:41:54

Scan duration: 28 sec

Tests performed: 19/19

Scan status: **Finished**

## Findings

### Missing security header: Referrer-Policy

CONFIRMED

URL	Evidence
<a href="https://www.spacex.com/vehicles/falcon-9/">https://www.spacex.com/vehicles/falcon-9/</a>	Response headers do not include the Referrer-Policy HTTP security header as well as the <meta> tag with name 'referrer' is not present in the response. <a href="#">Request / Response</a>

#### Details

#### Risk description:

The risk is that if a user visits a web page (e.g. "http://example.com/pricing/") and clicks on a link from that page going to e.g. "https://www.google.com", the browser will send to Google the full originating URL in the **Referer** header, assuming the Referrer-Policy header is not set. The originating URL could be considered sensitive information and it could be used for user tracking.

#### Recommendation:

The Referrer-Policy header should be configured on the server side to avoid user tracking and inadvertent information leakage. The value **no-referrer** of this header instructs the browser to omit the Referer header entirely.

#### References:

[https://developer.mozilla.org/en-US/docs/Web/Security/Referer\\_header:\\_privacy\\_and\\_security\\_concerns](https://developer.mozilla.org/en-US/docs/Web/Security/Referer_header:_privacy_and_security_concerns)

#### Classification:

CWE : **CWE-693**

OWASP Top 10 - 2013 : **A5 - Security Misconfiguration**

OWASP Top 10 - 2017 : **A6 - Security Misconfiguration**

OWASP Top 10 - 2021 : **A5 - Security Misconfiguration**

### Missing security header: Content-Security-Policy

CONFIRMED

URL	Evidence
<a href="https://www.spacex.com/vehicles/falcon-9/">https://www.spacex.com/vehicles/falcon-9/</a>	Response does not include the HTTP Content-Security-Policy security header or meta tag <a href="#">Request / Response</a>

#### Details

#### Risk description:

The risk is that if the target application is vulnerable to XSS, lack of this header makes it easily exploitable by attackers.

**Recommendation:**

Configure the Content-Security-Header to be sent with each HTTP response in order to apply the specific policies needed by the application.

OWASP Top 10 - 2017 : [A6 - Security Misconfiguration](#)  
OWASP Top 10 - 2021 : [A5 - Security Misconfiguration](#)

## Missing security header: X-Content-Type-Options

CONFIRMED

URL	Evidence
<a href="https://www.spacex.com/vehicles/falcon-9/">https://www.spacex.com/vehicles/falcon-9/</a>	Response headers do not include the X-Content-Type-Options HTTP security header <a href="#">Request</a> / <a href="#">Response</a>

**Details****Risk description:**

The risk is that lack of this header could make possible attacks such as Cross-Site Scripting or phishing in Internet Explorer browsers.

**Recommendation:**

We recommend setting the X-Content-Type-Options header such as `X-Content-Type-Options: nosniff`.

**References:**

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/X-Content-Type-Options>

**Classification:**

CWE : [CWE-693](#)

## Server software and technology found

UNCONFIRMED ⓘ

Software / Version	Category
 Azure	PaaS
 Azure Front Door	Load balancers
 GSAP 3.11.4	JavaScript frameworks
 Open Graph	Miscellaneous
 Plyr	Video players
 Swiper	JavaScript libraries
 DigiCert	SSL/TLS certificate authorities
 HSTS	Security

**Details****Risk description:**

The risk is that an attacker could use this information to mount specific attacks against the identified software type and version.

**Recommendation:**

We recommend you to eliminate the information which permits the identification of software platform, technology, server and operating system: HTTP server headers, HTML meta information, etc.

---

🚩 Website is accessible.

---

🚩 Nothing was found for vulnerabilities of server-side software.

---

🚩 Nothing was found for client access policies.

---

🚩 Nothing was found for robots.txt file.

---

🚩 Nothing was found for absence of the security.txt file.

---

🚩 Nothing was found for use of untrusted certificates.

---

🚩 Nothing was found for enabled HTTP debug methods.

---

🚩 Nothing was found for enabled HTTP OPTIONS method.

---

🚩 Nothing was found for secure communication.

---

🚩 Nothing was found for directory listing.

---

🚩 Nothing was found for missing HTTP header - Strict-Transport-Security.

---

🚩 Nothing was found for domain too loose set for cookies.

---

🚩 Nothing was found for HttpOnly flag of cookie.

---

🚩 Nothing was found for Secure flag of cookie.

---

🚩 Nothing was found for unsafe HTTP header Content Security Policy.

---
